Success in Leadership

Vision  The vision of FM is to be Fulton and Montgomery Counties’ preferred resource for post-secondary education, a potent catalyst for economic development and a vital center for cultural enrichment.

Mission  FM is Fulton and Montgomery Counties’ partner for quality education, accessible transfer and career programs, economic development, and cultural and intellectual enrichment.

Fulton-Montgomery Community College
It is my pleasure to present to you Fulton-Montgomery Community College’s Annual Report for 2009 - 2010. The theme of this year’s annual report is “success”; as you read the subsequent pages of this document, you’ll understand why.

FM has experienced tremendous success over the past year. In 2009 - 2010 enrollment at FM increased by 16% (27% over the past four years). Equally as important, FM had its largest graduating class in the history of the College, which means that students are succeeding.

This year there were many areas of success with our campus facilities. During the Summer of 2010 FM installed its new “clean room” that is designed to prepare students for work in high-tech industries like GLOBALFOUNDRIES. We created a new café outside of the Evans Library which we are calling Books & Bytes. This new space provides a unique gathering space for students and faculty with a coffee house atmosphere. We built two new classrooms, a new early childhood education lab, and new board room (the former board room became two classrooms).

Once again FM has had success in its curriculum and instruction. Our students are performing well. The graduates of our Radiologic Technology program had a 100% first time pass rate on their licensure exam. The Nursing Program students continue to be in high demand. Local industries participated in two DACUM (Developing a Curriculum) processes in order to keep our programs current and relevant to the workplace.

FM successfully launched a new “shared governance” system on campus - a College Senate. The purpose of the Senate is to recommend policies and curricula, as well as provide a forum for each of our constituent groups (faculty, staff, students) the opportunity to share ideas and concerns for the future and the direction of the College.

FM has had success in serving students’ needs. We expanded the library hours to open on Sunday in order to meet student demand. We launched a new e-tutoring effort to assist a growing distance learning population.

Lastly, FM has had success in acquiring additional resources. This year, FM was awarded $5.5 million in state and federal grants. These grants are providing the College with resources that help us prepare students for work in the healthcare field, purchase equipment for the Center for Engineering and Technology, and update our curriculum.

The 2009 - 2010 academic year has truly been a successful one. As you read the following pages, I know that you will be as proud of your community college as we are proud to serve our students and community.

Sincerely,

Dr. Dustin Swanger
President
Success in Accomplishments

The Spring 2010 graduating class at FM was our largest class, demonstrating our continued growth over the past four years. We’re well positioned for continued growth in key academic areas with new housing planned for Fall 2012, campus-wide upgrades, and additional offerings at our Riverfront Center location.

Center for Engineering and Technology

After many years of planning, the Center for Engineering and Technology has become a reality. This Center encompasses the disciplines of Science, Technology, Engineering, and Mathematics: the core building blocks needed to work in today’s high-tech industries. A demonstration clean room was constructed on-campus to provide students with technical skills and experience they need to be competitive in today’s job market.

National Board Examinations

The 2009 graduating class of Radiologic Technicians accomplished a 100% pass rate on the ARRT national board examinations. Nationally, FM grads in this program scored above the national average in every category.

Enrollment

In the Fall of 2009, FM’s enrollment hit a new high and grew enrollment by 16% in one semester. FM’s student population has grown 27% over the past four years.
Services Enhanced at the Riverfront Center in Amsterdam

In addition to offering day and evening classes at the Riverfront Center, students can now benefit from additional services including placement testing during the day and evening, academic advising, and the convenience of submitting college documents at this location.

Housing

The Fulmont College Association (FCA) was successful in their bid to purchase Campus View Student Housing. This is an important step toward expanding on-campus housing options and continuing to provide a safe, living and learning environment for our out-of-town students. Additional plans are underway to expand housing further for Fall 2012.

Campus Upgrades

Numerous upgrades were made to the campus including a new lab and classroom for the Early Childhood Education program, a new digital sign for the main entrance, new digital photography labs, and new classrooms. The Administration Building was upgraded with fresh paint and new lighting, a new and improved café was opened, and upgrades have been made to the Clock Tower.
FM is committed to providing our students with cutting-edge technology. With an eye on the high-tech industry flourishing in our region, we’re proud to announce new additions such as an atomic force microscope. These efforts will support technical training for industries such as semiconductor manufacturing, while also enhancing instruction in the basic sciences.

Radiologic Technology
- In April 2010, the Medical Imaging Student Association (MISA) and FM’s Rad Tech freshmen, through a service learning project, hosted “The Alzheimer’s Project”. The community was invited to view Emmy-award winning documentary films depicting different aspects of Alzheimer’s disease. Regional Director of the Alzheimer’s Foundation Bill Hinrichs was on-hand to facilitate a question and answer session.
- Students participated in the Memory Walk held on-campus in May 2010 to raise money for the Alzheimer’s Foundation.
- A pilot program in Clinical Mammography was implemented for the summer of 2010 with St. Mary’s Hospital in Amsterdam. Upon completion of this three-week clinical study, ARRT registered graduates met the clinical requirements needed to sit for the Mammography portion of the ARRT certifying examination.

Nursing
- Sherry Warner, Nursing Instructor and Robert Warner, Director of Nursing served as 2010 New York State Delegates to the American Nurses Association.
- Robert Warner was appointed to the New York State Board for Nursing for a five-year term.
- FM’s Student Nurses Association (SNA) was active through such activities as sponsoring a Wellness Week speaker, sponsoring families in need at the holidays, and fundraising for the Cystic Fibrosis Association.
Workforce Development

Responsive to Industry Needs
In Spring 2010, the Business and Technology Divisions re-established their advisory councils with new membership from industry professionals. Each division held a kick-off meeting to facilitate networking and collaborative efforts to ensure that curriculum and services remain responsive to industry needs. The Business Division meeting theme for 2009-2010 was “Building a Better Business Division”. The Technology Division meeting included a keynote speaker, F. Michael Tucker, President and CEO of the Center for Economic Growth, who presented “Technology Employment Opportunities in the Capital District”.

Building Analyst Program
The Center for Energy Efficiency and Building Science at FM provides training to construction industry professionals to enhance their performance within building science technology, enabling them to provide more efficient heating and cooling energy solutions for their customers. This program is offered in collaboration with the New York State Energy Research and Development Authority (NYSERDA) and will enable participants to prepare for certification through the Building Performance Institute (BPI). The Building Analyst program is provided by the College under our Business & Industry Center (B&IC).

Department of Labor Healthcare Training Grant
FM received a $2.86 million U.S. Department of Labor, Health Care Sector and Other High Growth and Emerging Industries Grant, designed to invest in job training programs that prepare workers for careers in health care and biotechnology. FM’s Healthcare Employment And Leadership Training Hub (HEALTH) program will train over 102 students as Certified Nursing Assistants (C.N.A.’s), 17 as Registered Nurses (R.N.’s), and provide training for those already involved in the healthcare arena as R.N.’s. Employment growth in these industries (particularly in health care) will be driven by the significant demand increases of an aging population and projected retirements for the current workforce.

Center for Engineering and Technology
FM’s Center for Engineering and Technology (CET) has received a second round of funding from the federal government to expand the program area and add new equipment. Senators Charles Schumer and Kirsten Gillibrand, together with Congressman Paul Tonko, secured an additional $500,000 from NASA and the Deptartment of Education’s Fund for the Improvement of Postsecondary Education (FIPSE) program to support FM’s CET. This funding will facilitate the acquisition of critical pieces of equipment that will be utilized across the science, technology, engineering and mathematics (STEM) curriculum in an effort to produce technicians for the workforce of the future.

FM’s Demonstration Clean Room
To meet the needs of local manufacturing and high technology businesses that are moving to our region, FM is training students to be ready to operate in a clean room environment.
A thriving college means a thriving campus. With a new College Senate in place, continued athletic successes, enhanced student services, and additional library hours, FM is growing right along with our student body.

STUDENT LIFE ON CAMPUS

College Senate
After much thought and collaboration between college administration and faculty, the College Senate began its first year in the Fall of 2009. During this time, the Senate passed policy recommendations for a variety of college-wide initiatives and voiced its concern to the Governor’s Office about proposed budget cuts to higher education in the State of New York.

ETutoring
During Spring 2010, FM expanded its support services and began an on-line tutoring pilot, offering additional tutoring through e-Tutoring, a web-based, on-line tutoring platform. In addition to on-campus tutoring, FM students now have access to an additional learning community where they can access resources, on-line instruction, and guidance from trained eTutors to meet their individual learning goals.

THE EVANS LIBRARY AND LEARNING COMMONS

Library Sunday Hours
With the on-going requests from students for increased weekend hours, the Evans Library now offers regular Sunday hours. During these additional hours, the Library is able to provide reference services and technical assistance while the Writing Center provides tutors.

Community Efforts
The Evans Library held fund drives to replace late book fines. During the Spring Semester, library fines were forgiven if
canned goods were brought in for the “Food for Fines” drive while during the Fall Semester, library fines were forgiven if a new toy was brought in for the “Toys for Fines” drive. These donations benefited needy persons and families in both Fulton and Montgomery Counties.

Print Management System
The Library implemented a new print management system in the Learning Commons. This software promises to minimize paper waste and assist the College’s efforts to be a more ‘green’ campus.

ATHLETICS

Academic Athletes of the Year
- Jenna Malagisi, Women’s Soccer, Major: General Studies
- Anthony Osorio, Men’s Baseball, Major: Criminal Justice Studies

Athletes of the Year
- Victoria Dufort, Women’s Soccer, Basketball, and Softball, Major: General Studies
- Daniel Schulz, Men’s Basketball, Major: Health, Physical Education & Recreation Studies

Mountain-Valley Conference
Each year the Mountain-Valley Conference selects two All-Conference Teams from the ten member body in each sport.
- Michelle Damiano, Women’s Soccer (2nd Team), Major: General Studies
- Kathleen Dwyer, Women’s Basketball (2nd Team), Major: General Studies
- Amy Hitchcock, Women’s Softball (2nd Team), Major: General Studies

NJCAA Academic All-American and Academic All-Region
NJCAA Academic All-American status is awarded to students who have a cumulative GPA of 3.60 or higher with 45 credits or more at their respective institutions. The Academic All-Region team is selected from students carrying a GPA of 3.20 or higher with 45 credits or more at their respective institution, and is an active team participant.
- Sarah Long, Women’s Basketball, Academic All-American and Academic All-Region, Major: Health, Physical Education & Recreation Studies
- Jenna Malagisi, Women’s Soccer, NJCAA Academic All-American and Academic All-Region, Major: General Studies
- Anthony Osorio, Men’s Baseball, Academic All-Region, Major: Criminal Justice Studies
- Dustin Palmateer, Men’s Baseball, Academic All-Region, Major: General Studies
Success in Preparing for the Future

In these challenging economic times, fundraising at FM has been an astonishing success. Generous alumni and the strategic Campaign for FM have both resulted in growth in our scholarship endowments and extensive upgrades to high-tech teaching facilities.

The Foundation supports the College as it strives to promote academic excellence by focusing on the success of every student. FM is reaching for tomorrow through on-going upgrades to the campus facilities and technology. Programs and services are being strengthened and resources are expanding.

Your gifts make all of this possible. Contributions ensure continued funding for student scholarships, academic and cultural programs, special projects, equipment purchases and faculty and staff development.

The Foundation of FM is grateful for the generosity of donors who support the College.
Scrabble Tournament
In October 2009, the Foundation hosted a Scrabble Team Challenge fundraiser. Twelve teams enjoyed the team-building event and raised nearly $2,500 for the Foundation.

17th Annual Golf Classic
FM’s Foundation, together with NBT Bank, hosted the 17th Annual Golf Classic at Fox Run Golf Club this past May. The event raised over $26,300.

5th Annual Alumni Car Show and Craft Fair
The 5th Annual Alumni Association’s Car Show and Craft Fair was another tremendous success with 96 show vehicles, 45 vendors, and hundreds of spectators on-campus. Nearly $3,400 was raised for the Alumni Scholarship Fund.

Intermountain Trio Holiday Concert
IM3 performed a holiday benefit concert raising nearly $1,400 in support of the Foundation.
Success in Preparing for the Future

CONTINUED

Campaign for FM
The Foundation announced a $2 million fundraising campaign to provide the critical investments to keep our students competitive in an increasingly technologically advanced workplace. The four strategic areas are:

• Funding Innovative Teaching and Learning Facilities
• Expanding Academic Healthcare Facilities
• Increasing Scholarship Support
• Expanding the Cultural and Intellectual Enrichment of the Region

To date, the Foundation has secured over $1.5 million in donations and pledges from over 350 donors.

Distinguished Alumni
The Foundation, along with NBT Bank, honored Michael Campos, ’66 for Lifetime Achievement, Stephen Tomlinson, ’89 for Excellence in the Professions, and Lisa Queeney-Vadney ’78 for Excellence in Business at the Annual Distinguished Alumni Awards Dinner held last September at Johnstown’s Holiday Inn.

Scholarship Endowments Continue to Expand
Donors expanded their support for scholarships by contributing over $50,000 in new scholarship funds including two new endowments; Jane Peck Easterly Memorial Scholarship and the Maceyka Family Scholarship.
