

Welcome to Radiologic Technology at FMCC!

Our distinctive program focuses on the success and growth of each student both academically and professionally within the exciting field of Medical Imaging.

This program of study provides the student with the essential qualifications to obtain an A.A.S degree in

Radiologic Technology. Graduates will be eligible to take the examination of the American Registry of Radiologic Technologists for certification and New York State licensure.

Radiologic Technology began at FM in 2004 out of the surrounding communities' need for

Radiographers. At this time, one of our local hospitals employs over 30 of our graduates in Radiography. Many graduates have furthered their career with on the job training or transferring to another college. These graduates are now employed in advanced imaging modalities such as: Ultrasound, Echocardiography, Computed Tomography, Magnetic Resonance Imaging, Radiation Therapy, Radiologist Assistant, Bone Densitometry, and Mammography.

This program provides a highly personalized education. The Radiologic Technology classroom/laboratory has a state-of-the-art digital radiography room, where all core classes are held. Faculty offices are located next door to the classroom. The faculty is committed to the achievements of each student from coordinating academic support, introducing the hospital/clinical environment, through to job placement or advanced study. It is our mission to provide an excellent education, partner with local healthcare facilities, graduate professionals who will continue their education, fulfill employment needs within their communities, and promote high quality patient care.
