RADIOLOGIC TECHNOLOGY AWARDS

Students:

Medical Imaging Student Association Achievement Award
Given by MISA (student radiologic technology club) to a graduate of the Radiologic Technology Program with a cumulative GPA of at least 3.0 and who has made significant contributions to the club.

Distinguished Graduate by Academic Program Award
Awarded to graduating students who have demonstrated academic achievement and show promise of future success.

Gertrude Dourdounas
Awarded to graduate in Radiologic Technology with the highest GPA. In memory of Gertrude Dourdounas, who dedicated her life to maintaining high educational standards and a concern for better patient care. She motivated students and was always providing the guiding hand. As an educator and radiographer, she provided the profession with strength and integrity.

JRCERT Certificate of Excellence Award for Students
The purpose of this award is to recognize a student graduating from a JRCERT accredited program for achieving excellence in the radiologic sciences. The criteria for the award and the selection of the recipient is the prerogative of the program officials and its faculty. Each accredited program is limited to one award per year.

Ken Simek Patient Care Award
Given in memory of Ken Simek, RN, to a graduate in nursing and radiologic technology who exemplify excellent patient care, passion for their profession, and overall willingness to help others.

Advanced Imaging Modality Award
Awarded to graduating student from Radiologic Technology showing promise of future success by pursuing formal education in an advanced imaging modality. Preference will be given to those students pursuing sonography or echocardiography.
“The Leslie Poyfair Memorial Award”
Criteria: Student in Radiologic Technology that is Honest, Sincere and Hardworking
Description:
My mother, Leslie Poyfair, was not just a great mother, wife, sister and daughter who cared for her family, she was a wonderful advocate for her patients. She was respectable, knowledgeable, and a giving person down to her soul. She started her medical career as an Emergency Medical Technician for Fulton County Ambulance Corporation. While working she was taking classes to become a Radiologic Technologist. After receiving her degree, she received an opportunity to work at Nathan Littauer Hospital. A few years down the road she became the Clinical Instructor for FMCC’s radiology program. During this time, I could remember her saying how every semester a new group of future Technologists would start and she would feel a sense of pride that she had just a little touch in helping them plan their futures. My mother was always trying to better her knowledge and was interested in becoming a CT Technologist. Before her untimely passing she was studying for her boards with a lovely professor. My mother absolutely loved Medical Imaging and working with the community and her colleagues.

Oncology Award
Awarded to a graduating/transfer student who has shown compassion for cancer patients and is interested in working in the field of oncology

"The Val Krawiecki Memorial Award"

Clinical Educators:

JRCERT Certificate of Excellence Award for Clinical Educators
The purpose of this award is to recognize a clinical educator from a JRCERT accredited program for achieving excellence in the radiologic sciences. The criteria for the award and the selection of the recipient is the prerogative of the program officials and its faculty. Each accredited program is limited to one award per year.
